PART III—SECTION 2

Notifications and Notices issued by the Patent Office relating to Patents and Designs

THE PATENT OFFICE

Patents and Designs

Calcutta, the 20th February 1954

Special Notice

It is hereby notified for general information of the public that the Office of the Controller of Patents and Designs, Calcutta will remain closed on the following days during the rest of the year 1954 :—

March 19th	..	Doljatra
April 14th	..	First Bajakh
April 16th	..	Good Friday
May 17th	..	Buddha Purnima
June 3rd	..	Id-ul-Fitr.
August 10th	..	Id-uz-Zuha
August 21st	..	Janmastami
September 9th	..	Muhurram
October 2nd	..	Mahatma Gandhi's Birthday.
October 4th, 5th, 6th & 7th	..	Durga Puja
October 11th & 12th	..	Lakshmi Puja
October 25th	..	Kali Puja
November 5th	..	Jagadhatri Puja
December 25th	..	Christmas Day

CORRIGENDUM

In the Gazette of India, Part III, Section 2, dated the 6th February 1954, in page 23, column 1, under the heading "Alteration of Date"—

Insert the following :—

"48844. The claim to priority date 30th January 1952 has been abandoned and the application, dated as of 27th January 1953, the date of filing in India."

Applications for Patents

The dates shown in crescent brackets are the dates claimed under Section 78-A of the Act.

4th February 1954

51195. The Gold Mohur Mills Limited, and C. Smith. Improved slab catcher for yarn winding machines.

5th February 1954

51196. Satya Brata Ghose. Electric shock eliminator.

51197. Sanat Kumar Ganguly. A variable flow powder sprayer.

51198. The Permutit Company Limited. Improvements relating to the manufacture of articles of ion-exchange resins. (11th February 1953). [Addition to No. 43943.]

51199. K. Abildgaard-Elling. Method for producing salts, sparingly soluble in water, of penicillin esters. (6th February 1953).

51200. Societe Anonyme Des Manufactures Des Glaces Et Produits Chimiques De Saint-Gobain, Chauny & Cirey. An improved process for the smoothing and polishing of glass surfaces.

51201. Council of Scientific and Industrial Research. Manufacture of picking band leather.

6th February 1954

51202. P. Reggiani. Improvements relating to springs of rubberised fabric in strip form adapted to be stressed in tension.

51203. Cinetechnik A. G. Improvements in or relating to a process for hydrolysing cellulose acetate films with caustic soda lye.

51204. E. N. Ehrhart. Method of sugar refining.

51205. The English Electric Company Limited. Improvements relating to electric motor control systems. (13th February 1953).

51206. Titan Company A/S. Process for production of metallic iron concentrates and titanium dioxide concentrates from ores containing ilmenite.

51207. H. W. Burrington. Improvements in or relating to false-twisting devices.

9th February 1954

51208. Sudhir Lal Mukherjee, and Albert David Ltd. A process for the manufacture of "Diethylaminoaceto-2-m-xylidide".

51209. B. P. S. Pillay. An emergency lamp circuit to be used with A.C. and D.C. currents. (Addition to No. 42429.)

51210. Glaxo Laboratories Limited. Improvements in or relating to closures for bottles, jars, vials and like containers.

51211. The Firestone Tire & Rubber Company. Improvements in or relating to tire building apparatus.

51212. Colgate-Palmolive-Company. Dentifrice preparations.

51213. Colgate-Palmolive-Company. Chlorophyll preparations.

51214. Hercules Powder Company. Antiknock motor fuel.

51215. N. V. Philips Gloeilampenfabrieken. Improvements in or relating to devices for recording sound oscillations in spiral grooves on a plate-shaped carrier.

51216. Societe Anonyme Des Manufactures Des Glaces Et Produits Chimiques De Saint-Gobain, Chauny & Cirey. Curved glazing sheets and processes and apparatus for their manufacture.

51217. Rotary Hoes Limited. Lifting arrangement for a power-propelled earth-working machine.

51218. Prof. Dr. T. Reichstein. Process for the manufacture of functional derivatives of a new active substance from suprarenal glands.

51219. Prof. Dr. T. Reichstein. A new active substance and process for isolating it from suprarenal glands.

51220. Ciba Limited. Process for the manufacture of an oxy-steroid.

51221. Ciba Limited. Process for the manufacture of new amides.

10th February 1954

51222. B. M. Beards. Tobacco cutting and grading machine.
51223. Gelsenkirchener Bergwerks Aktiengesellschaft. Process and apparatus for briquetting fine grained ores.
51224. G. Crespi. Process for forming refractory lining in electric arc furnaces and refractory block for the same.
51225. Kanegafuchi Boseki Kabu-hiki Kaisha. Method and machine for forming fibre lags.
51226. Stamicarbon N.V. Process for the continuous manufacture of phenol.
51227. Merck & Co., Inc. Antitubercular compositions.
51228. National Research Development Corporation. The production of titanium and like high melting point metals. (20th February 1953).
51229. National Lead Company. Treatment of titanium metal sponge. (13th June 1953). [Addition to No. 49731.]
51230. H. Hodel. Elastic spikes for securing railroad tracks.
51231. Durand & Huguenin A.-G. Process for the manufacture of sulphuric acid ester salts of leucovat dyestuffs of the anthraquinone series. [Addition to No. 44816.]
51232. PERFOGIT Societa per Azioni. Polymerization of cyclic amides.
51233. Anstalt fur die Entwicklung von Erfindungen und gewerblichen Anwendungen ENERGA. Improvements in powder reactors.
51234. Union Carbide and Carbon Corporation. Thermochemical metal removal. (18th March 1953).
51235. Cannac Research and Development Company. Digestion of phosphate rock. (18th February 1953).
51236. E. Rosner. Improvements in or relating to burglar and like alarms.

Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patents Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933 of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Manager of Publications, Civil Lines, Delhi, and also on cash payment at the counter of the Government of India, Central Book Depots, 8 Hastings Street, Calcutta, in the course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of the specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office, on payment of the necessary charge which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

47235. V. R. Barve. Darkroom safelight. Accepted on 5th February 1954.

With a casing having lighting unit at one end and two frames for red and white glass respectively fixed together so that the joining angle forms a hinge pivotable on the casing, which switches over from red to white light and back, and arrangement on the white glass frame to help replace white glass by glasses of other colours.

47279. Harry Ferguson Limited. Improvements in or relating to hitch connections for connecting belt or the like driven apparatus to tractors. Accepted on 4th February 1954.

When the mill or like belt driven apparatus is raised above the ground the driving and driven pulleys are spaced sufficiently for non-driving of the mill.

47295. International Business Machines Corporation. Improvements in or relating to a delay circuit. (7th January 1952). Accepted on 9th February 1954.

Positive going pulses developed and connected to grid of triode; series networks of rectifiers and impedances between sources of negative and positive potentials and anode and negative potentials respectively; junction of two impedances connected to junction of first two rectifiers; load impedance between anode and positive potential source; output terminal connected to junction of second pair of rectifiers.

47843. The Micanite and Insulators Company Limited. A method of making mica products such as expanded mica, mica flakes, mica paper and mica mouldings. (15th August 1951). Accepted on 10th February 1954.

Heating mica to a temperature and for a time lying within the range between 760°C for half an hour and 625°C for twenty four hours and disintegrating the mica by mechanical agitation.

47949. Casablanca High Draft Company Limited. Improvements in or relating to spinning and preparatory machines. (26th September 1951). Accepted on 10th February 1954.

A frame pivoted at its rear end on a fixed axis behind the drafting arrangement and adapted for association with one or set of consecutive top roller clearers.

47962. The General Electric Company Limited. Improvements in or relating to electric carrier wave transmission systems. (28th August 1951). Accepted on 5th February 1954.

Signal pulse transmission by frequency modulation of carrier wave and amplitude modulation and addition signal transmission by amplitude modulation of carrier wave.

48106. Daimler-Benz Aktiengesellschaft. Improvements relating to precombustion chamber diesel engines. (6th August 1952). Accepted on 10th February 1954.

A body presenting part-spherical surface convexedly towards fuel jet supported in pre-combustion chamber.

48234. N. V. De Bataafsche Petroleum Maatschappij. Process for separating one or more solid hydrocarbons from a mixture thereof with oil, in particular for dewaxing paraffin wax containing oil. (19th December 1951). Accepted on 9th February 1954.

The mixture of solid hydrocarbons with oil is mixed with an organic solvent which dissolves the oil but not the solid and then with an auxiliary liquid, which is unreactive and immiscible with the oil phase and having a different s.g., in the presence of a surface active agent such that the contact angle θ has a value of at least 90°.

48278. Ciba Limited. Process for the manufacture of compounds by a method including the step of opening ring C in steroids. Accepted on 4th February 1954.

Treating 11-oxo- or 11-hydroxy-steroids saturated in the ring C, which contain in 7-position at least one hydrogen atom, with oxidizing agents, causing these agents to act upon 11:12-dioxo-9-hydroxy-steroids or 11-oxo-9:12-dihydroxy-steroids.

48283. Ford Motor Company of Canada, Limited. Door checking and holding device for motor vehicles. Accepted on 10th February 1954.

A second roller is pivotally and slideably mounted between straps and arranged to engage opposite edge of the check arm.

48304. Rheinpreussen Aktiengesellschaft, für Bergbau und Chemie. Process for the production of amino esters of amino-hydroxy-benzoic acids. (1st August 1952). Accepted on 9th February 1954.

By reducing an alkyl halogen ester of a nitro-hydroxy-benzoic acid, and then reacting with an amine containing a reactive hydrogen atom.

- 48306.** Rheinpreussen Aktiengesellschaft für Bergbau und Chemie. Process for the production of salts from organic acids and alkamine esters of unsubstituted amino-salicylic acids or of amino-salicylic acids substituted at the nitrogen atom. (30th July 1952). Accepted on 9th February 1954.
- By reacting the alkamine ester or a mineral acid salt thereof with an organic acid or a salt thereof respectively.*
- 48452.** G. M. Garde. Manufacture of sulphuric acid and sodium chloride from aqueous solutions of sodium sulphate and sodium bisulphate. Accepted on 10th February 1954.
- Reacting dry hydrogen chloride gas under pressure and at a temperature above 32°C with aqueous solution of sodium sulphate and/or bisulphate.*
- 48713.** Ciba Limited. Process for the manufacture of genins. Accepted on 10th February 1954.
- A product obtained by the treatment of crude glycoside with acid, is reacted with alkaline earth hydroxide and the insoluble portion is separated and extracted.*
- 48714.** Ciba Limited. A process for the isomerisation of compounds of the spirostane series. Accepted on 10th February 1954.
- Heating compounds of the spirostane series with propionic anhydride under atmospheric pressure.*
- 48819.** The General Electric Company Limited. Improvements in or relating to electrode holders for arc welding. (24th January 1952). [Addition to No. 45044.] Accepted on 4th February 1954.
- Comprising means for angular adjustment of atleast one of the surfaces adapted to engage the bared end of one of the electrodes.*
- 48846.** Ciba Limited. New process step in the manufacture of genins from glycosides. Accepted on 10th February 1954.
- Sludge obtained by fermentation of crude steroid saponins is treated with an alkaline earth hydroxide.*
- 48954.** Industrial and Financial Association Inc. Process and apparatus for the manufacture of phosphoric acid. Accepted on 5th February 1954.
- Wherein part of reaction magma is received from one reaction zone to vacuum chamber and then returned to a preceding reaction zone in continuous process.*
- 49028.** The Monotype Corporation Limited. Improvements in or relating to record-strip controlled individual-type casting and composing machines and to photo-typographical composing machines. Accepted on 5th February 1954.
- In which there is mounted on the normal jaw of one of the primary positioning levers a second jaw mounted on the normal jaw and placed in advance thereof and the mechanism controlled from record strip acts to render one or other of these jaws operative on any one of the gauge pins of the series.*
- 49036.** G. & J. Weir Limited. Improvements in or relating to evaporating plants. (5th May 1952). Accepted on 10th February 1954.
- Heating raw water in the presence of chemical additive to bring about disintegration of bicarbonate and carbonate ions so as to render it non-scale forming.*
- 49238.** Telephone Manufacturing Company Limited. Automatic tele-communication exchange systems and selector switches incorporated therein. (28th March 1952). Accepted on 5th February 1954.
- Consists of one selective relay unit in which armature is operated by current flowing in the winding, armature being held by residual magnetism.*
- 49275.** The English Electric Company Limited. Improvements relating to inductor alternators. (18th April 1952). Accepted on 4th February 1954.
- Wherein the rotor core is built up from core plates having similar angular inaccuracies in the slot pitch and similar identification means with respect to inaccuracies, said core plates being displaced angularly in the same direction.*
- 49384.** Braunschweigische Maschinenbauanstalt Aktiengesellschaft. Apparatus for and a method of clarifying the raw juices of cane sugar. Accepted on 5th February 1954.
- Mixing while conveying juice and lime from opposite ends of container through series of intercommunicating double-zoned chamber and introducing saturation gas therein at predetermined points.*
- 49385.** W. H. R. Behrens. Improvements in or relating to internal combustion engines. Accepted on 10th February 1954.
- Waste heat withdrawn directly by cooling medium directly from interior of each cylinder before beginning of working stroke.*
- 49474.** Les Laboratoires Dausse. Improvements in new morphine derivatives and production thereof. Accepted on 10th February 1954.
- Reacting morphine with a halide of the formula $R_1(R_2)-N-CH_2-CH_2-X$ or its hydrohalide.*
- 49645.** Ciba Limited. Process for the manufacture of aryl-bis-quaternary amine salts. Accepted on 10th February 1954.
- An amine or one of its monoquaternary salts is reacted with a reagent ester of an alcohol.*
- 49719.** Societe Des Usines Chimiques Rhone-Poulenc. Improvements in or relating to phenothiazine derivatives. (13th May 1953). Accepted on 9th February 1954.
- N-alkylaminophenothiazines are produced by (a) converting a corresponding 10-halogenoalkyl phenothiazine into the amine (b) reducing a 10-cyanoalkyl phenothiazine (c) reacting a phenothiazine with a halogeno phthalimidooalkane and treating the product to effect its fission.*
- 49791.** Verwaltungsgesellschaft der Werkzeugmaschinenfabrik Oerlikon. Projectile fuse. Accepted on 5th February 1954.
- Comprises a fuse casing, a detonator pin, shock safety means, locking means responsive to centrifugal force generated.*
- 49797.** Les Laboratoires Dausse. Process for the production of morphine derivatives. (12th January 1953). Accepted on 10th February 1954.
- Reacting alkali metal salt of morphine with a halide of the formula $R_1(R_2)-N-CH_2-CH_2-X$ or its hydrohalide under anhydrous conditions in presence of ethanol.*
- 49826.** The Dayton Rubber Company. Textile cot. Accepted on 5th February 1954.
- Drafting cot having surface of vulcanised oil resilient synthetic rubber material mixed with soft, porous and fibrous shells of nut like material.*
- 49859.** Nilratan Bose, Bimal Kumar Ghosh and Rabindra Nath Das. Improvements in or relating to plane tree rollers for jute spinning machines. Accepted on 10th February 1954.
- Rollers being made of laminated wood.*
- 49903.** Hamol A.-G. Process for the preparation of a new aldehyde derivative such as N-hydroxymethyl-methionine and salts thereof. (4th May 1953). Accepted on 4th February 1954.
- Reacting methionine with formaldehyde in alkaline solution at a pH of at least 7.*
- 49933.** Schlage Lock Company. Improvements in or relating to door closer. Accepted on 10th February 1954.
- Comprising a body having a cylindrical bore with a piston which divides it into chambers and connections for moving said body and piston relative to the movement of the door.*

49942. Western Electric Company, Incorporated. Voice-frequency signalling systems. (8th January 1953). Accepted on 5th February 1954.

Comprises amplifiers and guard tuned networks being antiresonant, rectifiers and electronic relays.

49959. Unilever Limited. Apparatus for controlling dictating machines. (28th August 1952). Accepted on 5th February 1954.

Apparatus comprises a remote controller at the dictator's telephone set and a main-station controller responsive to the switching signals of the remote controller.

50002. P. von Arx & Co. A.G. Arrangement for cleaning metal and stone surfaces through impact. Accepted on 9th February 1954.

Wherein an annular series of hammer-shaped impact tools impinge in succession under an acute angle on the surface to be cleaned.

50023. J. M. Huber Corporation. Dye toned printing inks. Accepted on 5th February 1954.

Comprising carbon block dispersed in a vehicle together with a solution in a solvent of a toning dustuffs which is insoluble in said vehicle while the solvent used is soluble in said vehicle.

50046. The Distillers Company Limited. Manufacture of substantially pure unsaturated nitriles. (13th August 1952). Accepted on 10th February 1954.

By allowing to react the unsaturated aldehyde and hydrogen cyanide contained as impurities to form a condensation product and the resulting mixture fractioned to recover the nitriles.

50096. Ciba Limited. Process for the manufacture of new cyclo-alkano-hydronaphthalene compounds. (5th September 1952). Accepted on 4th February 1954.

By reacting a 3-ethenyl-cyclohex-2-en-one unsubstituted in the 4-position or a functional keto derivative thereof with an alicyclic ketone.

50145. W. Heberer. Positive and negative electrode structures preferably for lead accumulators and process for the production thereof. Accepted on 9th February 1954.

Active particles like lead dust and connected by plastic binder and made to remain in a porous state.

50155. Merck & Co., Inc. Improvements in the filling of solid substances into containers by suspending the solid in a volatile liquid of substantially equal density. Accepted 4th February 1954.

Suspending the substance in a volatile liquid which is inert to the substance and is of a density approximately that of the substance, measuring into a container a desired amount of the substance and removing the liquid as a vapour.

50175. Monsanto Chemicals Limited. Improvements relating to germicides. (3rd September 1952). Accepted on 4th February 1954.

Comprises an aqueous solution of one or more germicidal phenols and an anionic or non-ionic dispersing agent in acidic conditions.

50193. Koppers Company, Inc. Gasification of fuels. Accepted on 9th February 1954.

A hot mixture of gaseous product from a gasifier is impinged on a bed of moving solid fuel.

50208. Malew Engineering Limited. Improvements in or relating to dies. (29th September 1952). Accepted on 5th February 1954.

Comprises in combination a male die part and a female die part, die part are physically unconnected base portions of thickness as to combine to form the required complementary male and female shapes.

50267. Dunlop Rubber Company Limited. Improvements in tyre moulds. Accepted on 5th February 1954.

Comprises a top mould part, a bottom mould parts and a segmentally formed annulus.

50347. Morris Motors Limited. Improvements relating to weather-excluders and the like for doors and windows. (27th September 1952). Accepted on 10th February 1954.

Wherein the spring clips are of single-channel formation and the attachment portion of the rubber strip is pierced by longitudinal slots through each of which a limb of one of the spring clips is threaded.

50665. L. Smalley. Improvements in mountings for doors of garages, lock-up shops, warehouses, stores or the like. (30th December 1952). Accepted on 4th February 1954.

Two rolling support members are connected to the door during the opening of which it rolls inwards from the door frame along track members, means being provided to prevent the rolling support from slipping on the track.

50670. Tannoy Limited. Improvements relating to loud-speakers. (19th November 1952). Accepted on 10th February 1954.

Mouth of the horn divided into sections each with its own throat extending to the energy source and the throats so designed that relative path lengths of sound reaching the mouth are such as to produce a phase and amplitude relationship between the various sections giving directional characteristic.

50751. Industrial Trustee Holding Company. A rail having several ribs. Accepted on 6th February 1954.

Rail formed by hollow body obtained by deforming a tube to produce ribs.

Printed Specifications Published

A limited number of printed copies of the undernoted specifications are available for sale from the Manager of Publications, Civil Lines, Delhi, or on cash payment at the counter of the Government of India, Central Book Depot, 8, Hastings Street, Calcutta, at two rupees per copy :—

45189, 45204, 45212, 45221, 45325, 45439, 45484, 45501, 45594, 45616, 45859, 45866, 46386, 46400, 46653, 46672, 46726, 46773, 46969, 47106, 47118, 47154, 47174, 47179, 47334, 47449, 47569, 47572, 47629, 47683, 47750, 47811, 47844, 47992, 48109.

45224, 45253, 45257, 45258, 45273, 45310, 45361, 45366, 45375, 45550, 45703, 46026, 46100, 46368, 46436, 46496, 46536, 46537, 46665, 46753, 46754, 46755, 46842, 46930, 46931, 46982, 47148, 47159, 47267, 47268, 47323, 47360, 47363, 47387, 47400, 47491, 47511, 47516, 47523, 47556, 47558, 47564, 47581, 47614, 47664, 47703, 47790, 47791, 47798, 47944, 48001, 48027, 48029, 48078.

Patents Sealed

45395, 46535, 46606, 46840, 46857, 46860, 46911, 47053, 47102, 47111, 47163, 47332, 47534, 47694, 47706, 47707, 48073, 48079, 48099, 48135, 48271, 48366, 48396, 48397, 48476, 48541, 48712, 48812, 48886, 48993, 49059, 49308, 49445, 49460, 49476, 49497, 49560, 49604, 49606, 49611, 49644, 49655, 49818, 49970.

Amendment Proceedings

(1)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that The Permutit Company Limited, a British Company of Permutit House, Gummersbury Avenue, London, W. 4, England, Manufacturers seek leave to amend the description in the specification in respect of patent application No. 47336. Any person desirous of opposing the application for amendment, should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (form 8 of the Indian Patents and Designs, Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendments may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office on payment of the usual charges.

(2)

Notice is hereby given under Section 17 of the Indian Patents and Designs Act, 1911, that Glaxo Laboratories Limited, a British Company, of Greenford, Middlesex, England, Chemical Manufacturers seek leave to amend the claims in the specification in respect of patent application No. 49129. Any person desirous of opposing the

application for amendment, should at any time within three months from the date of this Gazette, give notice of his intention to do so on the prescribed form (Form 6 of the Indian Patents and Designs Rules, 1933) in the Patent Office, 214, Lower Circular Road, Calcutta-17. The proposed amendments may be seen free of charge at the Patent Office, or copies thereof may be obtained from the Patent Office on payment of the usual charges.

Renewal Fees Paid

21847. 22136. 23705. 23795. 23835. 24000. 25147. 25289. 26058.
 27257. 27417. 27616. 27907. 28726. 28800. 28957. 29523. 29580.
 29714. 30611. 32299. 32333. 32386. 32468. 32640. 34208. 34209.
 34296. 34422. 34484. 34780. 34820. 35062. 35130. 36299. 36323.
 36638. 36775. 36794. 36868. 37147. 37194. 37196. 37273. 37276.
 37280. 37281. 38038. 38326. 38771. 39104. 39149. 39302. 39360.
 39436. 39446. 39594. 39627. 39720. 39754. 39797. 39971.
 40991. 40999. 41036. 41076. 41077. 41106. 41115. 41202. 41251.
 41254. 41284. 41321. 41363. 41364. 41396. 41429. 41488. 42561.
